

Google Ads launch package: Arrival Card Assist

Date: 2026-09-24. Site: <https://allindonesia-arrivalcard.com> (brand "Arrival Card Assist", operator Bulan Juli Limited, Hong Kong). Companion files: `docs/google-ads-keywords.csv` (campaigns, ad groups, keywords, negatives) and `docs/google-ads-rsa.csv` (63 responsive search ads in 8 languages). Both are in Google Ads Editor CSV import format (UTF-8 with BOM).

Note on sources: the policy pages on support.google.com, transparency.meta.com, ads.tiktok.com and about.ads.microsoft.com could not be opened from this environment (network egress blocked). Their content was verified through Google's own search snippets and through dated secondary reports quoting them. Every claim below carries its source. Re-read the four primary pages once before the first spend; they change without notice.

0. Summary

- Today (24 Sep 2026) ads that promote getting an Indonesia arrival card or e-VOA are a restricted category. They need Google's "Government documents and services" certification. From 5 Oct 2026 that certification is granted only to providers whose domain is linked as authorized from an official government website. Ditjen Imigrasi links no such provider. The application takes 10–12 business days, so any application filed now is decided under the new rule.
 - Conclusion: **the /apply and /evisa campaigns cannot run on Google unless Ditjen Imigrasi authorizes the company in writing and publishes a link**. This document ships them anyway, paused and labelled `mode-A-authorized-only`, so they are ready the day authorization arrives.
 - What can run now: informational campaigns for /guide, /reminder and /customs (labelled `mode-B-informational`), written without acquisition claims. This is lower risk, not zero risk: Google reviews the destination domain, which sells the service. Expect some disapprovals; appeal once, never re-submit the same ad repeatedly.
 - Meta (Facebook/Instagram) has no government-documents certification. Its rules for this category are the general ones (no implied affiliation, no misleading claims, no passport numbers in lead forms). TikTok bans immigration-law services and needs 18+ targeting for legal-adjacent services. Microsoft Advertising copied Google's authorization rule on 19 Aug 2026.
 - Before any spend, three site changes: (1) put the "free on the official portal" sentence with a link on /apply, /reminder, /pricing, /evisa and /customs (today it is only on the home page, /guide and the legal pages); (2) add a consent banner with Google Consent Mode v2 before targeting the EEA, the UK or Switzerland; (3) remove the "Template for legal review before launch" line from /legal/privacy and /legal/terms. See section 6.
-

1. Policy

1.1 Google Ads: what the rule is today and after 5 October 2026

Current policy ("Other restricted businesses: Government documents and services", support.google.com/adspolicy/answer/13156083):

- Scope: documents and services obtainable directly from a government, including visas, eVisas, electronic travel authorizations and entry/arrival forms. Trade press explicitly lists "Vietnam arrival card", "UK ETA", "official ESTA" style keywords as in scope (VisasNews, 2026).

- Only government entities and certified providers may run ads for these. A non-government provider has to apply for the certification. The landing page must clearly disclose that the advertiser is a private entity not affiliated with any government, disclose the fee, state that the document is available for free or cheaper from the government, and link to the official source (Brighterly guide; Google Ads Community threads 247062722 and 391402543).
- Since October 2025 Google adds an automatic "Not a government website" label to Search ads from non-government advertisers in this category (Kliken Help Center, "Google Ads Policy Update: Government Documents and Services Disclosure (October 2025)"). Our ads will carry that label. Our copy says the same thing, so it is consistent.

Update announced August 2026, enforced from 5 October 2026 (support.google.com/adspolicy/answer/17260489; Search Engine Roundtable, Aug 2026; Search Engine Land, Aug 2026; PPC News Feed, Aug 2026):

- Only governments and **authorized providers** may run ads that "promote direct acquisition" of a government document or service.
- Authorized provider = an advertiser that has been given explicit permission by the government to provide that specific document or service. Proof: **the advertiser's domain must be linked from an official, publicly accessible government website and be explicitly referenced there as authorized** for that document or service.
- Qualifies: a government-managed directory of approved partners, an official regulatory portal listing the provider. Does not qualify: business licences, commercial contracts, company registrations, government-hosted blog posts.
- Existing certifications built on commercial relationships rather than a public authorization are expected to lapse. Google can deny or revoke certification at any time.
- Timelines quoted by Google: advertiser verification 5–7 business days; certification decision 10–12 business days (TechWyse, Aug 2026). Filing in late September lands the decision after 5 October.

What this means for allindonesia-arrivalcard.com:

Ad	Landing page	Before 5 Oct 2026	From 5 Oct 2026
"We prepare your arrival card, from \$24.90"	/apply	Needs certification (not held)	Only with Ditjen Imigrasi authorization link
"e-VOA assistance \$70.90"	/evoa	Needs certification (not held)	Only with authorization link
"Free guide: how the arrival card works"	/guide	Grey area, see below	Grey area, see below
"Free reminder when your 72-hour window opens"	/reminder	Grey area	Grey area
"Customs allowances explained"	/customs	Not a government document ad; allowed	Allowed

The grey area: the update text limits the new rule to ads that "promote direct acquisition". An ad for a free guide does not. But Google reviews the whole destination, and the guide and reminder pages both carry a paid call to action. Practical position: run informational ads, keep the copy free of acquisition claims, keep prices out of the informational ads, and accept that a reviewer may still apply the label or disapprove. One appeal per disapproved ad, with the argument that the ad and page are informational. Never open a second account or a second domain to get around a disapproval; that is "Circumventing systems" and ends the account.

Related rules that still apply to every ad on this site:

- Misrepresentation: no "official", no government names as if they were ours, no emblems, no ".go.id" colours. "All Indonesia" may be used descriptively in a description ("the All Indonesia arrival card"), never in a headline as a brand. The domain itself contains "allindonesia". See section 6 for the risk.

- Advertiser identity verification is mandatory for this category. Have the HK Certificate of Incorporation, Business Registration (76938968-000) and a document showing the registered address ready.
- Consent Mode v2 is required for EEA and UK traffic since March 2024 (support.google.com/google-ads/answer/13695607).

1.2 How to apply for Google's certification (do it now, even if refused)

1. Google Ads > Admin > Advertiser verification. Complete "About your business" and "Business operations" verification with the HK company documents. Wait for the confirmation email (5–7 business days).
2. Open the policy page support.google.com/adspolicy/answer/13156083 and click the "apply for certification" link under "Government documents and services". The form is a Google support form (title "Government documents and services certification"). Fill it per Google Ads customer ID.
3. Fields the form asks for (from the Ads Community threads): customer ID, country/countries of targeting, the domain, the government document(s) covered (Indonesia arrival card; Indonesia e-VOA), and **the URL of the government page that lists the domain as an authorized provider**. Until Ditjen Imigrasi publishes that page, leave the field with the letter reference (section 1.3) and expect a refusal. A refusal on file is useful: it proves good faith to Airwallex, to the card schemes and in any later appeal.
4. Decision by email in 10–12 business days. The certificate is attached to the account, not to a campaign.
5. Re-apply only when the authorization link exists. Repeated applications with the same evidence are ignored.

Evidence checklist for a successful application (what "authorized provider" looks like in practice):

- A page on imigrasi.go.id, kemenimipas.go.id or allindonesia.imigrasi.go.id that names Bulan Juli Limited / Arrival Card Assist and links to allindonesia-arrivalcard.com as an approved assistance provider.
- Or a listing in a government-run directory of partners (the way VFS Global is listed for visa services).
- Not enough: a letter from Imigrasi, a contract, the HK company registry, a news article, a blog post on a regional immigration office site.

1.3 Requesting authorization from Ditjen Imigrasi

Who and where (imigrasi.go.id/ppid-page/kontak-eppid; kemenimipas.go.id contact page; verified September 2026):

- Direktorat Jenderal Imigrasi, Kementerian Imigrasi dan Pemasarakatan RI. Director General since 1 April 2026: Hendarsam Marantoko (bengkulu.imigrasi.go.id, April 2026). Check the name on imigrasi.go.id/pejabat before sending.
- Address: Gedung Direktorat Jenderal Imigrasi, Jl. H.R. Rasuna Said Kav. X-6, Kuningan, Jakarta Selatan 12940.
- Email: humas@imigrasi.go.id (public relations). Also file the same text as a formal public-information request through ePPID (imigrasi.go.id/ppid-page/kontak-eppid). Under Law 14/2008 on Public Information (KIP) the PPID must answer a written request within 10 working days, extendable once by 7. That is the only channel with a legal response deadline.
- Send: courier with signed original, email PDF to humas@imigrasi.go.id, ePPID form. Keep the courier receipt and the ePPID ticket number.

Expected outcomes and next step for each:

- "No scheme exists; the arrival card is free and must be filed by the traveler": file the reply with the Google refusal. Stay in mode B. Revisit in 6 months.
- "Submit a proposal": ask for the criteria in writing, then offer the terms already on the site (disclosure, price first, no logos, PDP compliance, human-in-the-loop, 30-day deletion).
- "Authorized, with conditions": ask for the public listing URL. That URL is the Google evidence.

Draft letter (English)

Bulan Juli Limited Unit 909, Prosperity Millennia Plaza, 663 King's Road, Quarry Bay, Hong Kong Company
Registration No. 76938968 · info@allindonesia-arrivalcard.com

Hong Kong, [date]

To: Director General of Immigration Directorate General of Immigration, Ministry of Immigration and
Corrections of the Republic of Indonesia Jl. H.R. Rasuna Said Kav. X-6, Kuningan, Jakarta Selatan 12940 Cc:
Public Relations (humas@imigrasi.go.id); PPID Ditjen Imigrasi

Subject: Request for information on the authorization of third-party assistance providers for the All Indonesia
arrival card

Dear Director General,

Bulan Juli Limited is a Hong Kong company operating "Arrival Card Assist" (allindonesia-arrivalcard.com), a
private assistance service for travelers completing the All Indonesia arrival card and, where applicable, the e-
VOA.

We wish to state clearly how we operate. We are not affiliated with the Government of Indonesia and say so
on every page. We tell every visitor that the arrival card is free of charge on allindonesia.imigrasi.go.id and link
to it. Our fee is shown before any personal data is entered and covers guided data collection, manual
verification by a trained person, submission on the traveler's behalf inside the 72-hour window, and support.
We do not use automated or bulk submission, we do not use government emblems or names in our branding,
and we delete passport data 30 days after arrival in line with Law 27/2022 on Personal Data Protection.

Advertising platforms (Google, from 5 October 2026; Microsoft, from 19 August 2026) now allow advertising of
assistance with government documents only by providers that the issuing authority lists publicly as authorized.
We therefore respectfully request the following information:

1. Whether the Directorate General operates or plans a scheme for authorized third-party assistance
providers for the All Indonesia arrival card or the e-VOA, and the criteria and procedure to apply.
2. If no such scheme exists, written confirmation to that effect.
3. Any conditions the Directorate General would require of an assistance provider (disclosures, data
handling, submission method, reporting), which we undertake to meet.

We are available to present our procedures in Jakarta or online at your convenience.

Respectfully, [Name], Director, Bulan Juli Limited

Draft surat (Bahasa Indonesia)

Bulan Juli Limited Unit 909, Prosperity Millennia Plaza, 663 King's Road, Quarry Bay, Hong Kong Nomor
Registrasi Perusahaan 76938968 · info@allindonesia-arrivalcard.com

Hong Kong, [tanggal]

Kepada Yth. Direktur Jenderal Imigrasi Direktorat Jenderal Imigrasi, Kementerian Imigrasi dan
Pemasyarakatan Republik Indonesia Jl. H.R. Rasuna Said Kav. X-6, Kuningan, Jakarta Selatan 12940
Tembusan: Bagian Humas (humas@imigrasi.go.id); PPID Ditjen Imigrasi

Perihal: Permohonan informasi mengenai otorisasi penyedia layanan bantuan pihak ketiga untuk kartu
kedatangan All Indonesia

Dengan hormat,

Bulan Juli Limited adalah perusahaan yang berkedudukan di Hong Kong dan mengoperasikan "Arrival Card Assist" (allindonesia-arrivalcard.com), yaitu layanan bantuan swasta bagi wisatawan dalam mengisi kartu kedatangan All Indonesia dan, bila diperlukan, e-VOA.

Kami ingin menyampaikan secara terbuka cara kami beroperasi. Kami tidak berafiliasi dengan Pemerintah Republik Indonesia dan menyatakannya di setiap halaman. Kami memberitahukan setiap pengunjung bahwa kartu kedatangan dapat diisi secara gratis di allindonesia.imigrasi.go.id dan mencantumkan tautannya. Biaya layanan kami ditampilkan sebelum data pribadi apa pun dimasukkan dan mencakup pengumpulan data terpandu, pemeriksaan manual oleh petugas terlatih, pengajuan atas nama pelanggan di dalam jendela 72 jam, serta dukungan. Kami tidak menggunakan pengajuan otomatis atau massal, tidak menggunakan lambang atau nama instansi pemerintah dalam merek kami, dan menghapus data paspor 30 hari setelah kedatangan sesuai UU 27/2022 tentang Pelindungan Data Pribadi.

Platform periklanan (Google mulai 5 Oktober 2026; Microsoft mulai 19 Agustus 2026) kini hanya mengizinkan iklan layanan bantuan dokumen pemerintah dari penyedia yang dicantumkan secara publik sebagai penyedia resmi oleh instansi penerbit. Oleh karena itu, dengan hormat kami memohon informasi sebagai berikut:

1. Apakah Direktorat Jenderal Imigrasi memiliki atau merencanakan skema penyedia layanan bantuan pihak ketiga yang diotorisasi untuk kartu kedatangan All Indonesia atau e-VOA, beserta kriteria dan prosedur pengajuannya.
2. Apabila skema tersebut tidak ada, konfirmasi tertulis mengenai hal tersebut.
3. Persyaratan apa pun yang akan diminta Direktorat Jenderal dari penyedia layanan bantuan (pernyataan non-afiliasi, pengelolaan data, metode pengajuan, pelaporan), yang kami sanggupi untuk dipenuhi.

Kami bersedia memaparkan prosedur kami di Jakarta atau secara daring sesuai waktu yang Bapak/Ibu tentukan.

Hormat kami, [Nama], Direktur, Bulan Juli Limited

1.4 The compliant fallback if refused

Google, mode B only:

- Run only the ***-Informational** campaigns (ad groups how-to-fill, app-problems, customs-declaration, transit). Landing pages /reminder, /guide, /customs. No price, no "we submit", no "get your card". Copy stresses "private assistance service", "not a government website", "free guide", "free reminder", "links to the official portal".
- Keep ***-Transactional** campaigns paused. Do not "test" one ad. A disapproval under this policy is recorded against the account, and three strikes suspend it.
- Conversion goal for these campaigns is **generate_lead** (reminder saved). Orders arrive later through the reminder email, which is direct/email traffic in Google's eyes but carries the stored first-touch **gclid** (section 5), so GA4 still credits the click.

Microsoft Advertising (Bing): same rule as Google since 19 Aug 2026. Third-party providers need pre-approval through the "Government services advertising program" with proof of authorization in the target market; aggregators, affiliates and lead-gen are prohibited; unauthorized providers must say they are unauthorized and separate the service fee from the government fee (PPC News Feed, Aug 2026; [about.ads.microsoft.com](https://about.ads.microsoft.com/policy) policy "Authorized third-party government services"). Treat as closed for /apply and /evoa. Informational ads are the same grey area as on Google, on a much smaller audience. Skip Bing until Google mode B has data.

Meta (Facebook, Instagram), the main paid channel while Google is closed:

- No government-documents certification exists. The rules that bite are "Unacceptable Business Practices" and "Fraud, Scams and Deceptive Practices" (implied affiliation, fees for free services without disclosure, misleading claims), "Personal attributes", and the ban on asking for government identifiers such as passport numbers in Instant Forms (transparency.meta.com ad standards, 2026). Meta is extending advertiser verification to most spend by end 2026 (Stackmatix, 2026); verify the business in Business Manager now.
- Compliant creative: primary text opens with "Private assistance service, not affiliated with any government website." Price in the creative for conversion campaigns. No emblems, no "official". Hook: "Flying to Indonesia in more than 3 days? The arrival card can only be filed 72 h before landing. Get a free reminder."
- Structure: one campaign per language, Sales objective (Purchase) for /apply audiences already in the 72-hour window is impossible to target, so use Leads objective (Lead event = reminder) to /reminder, plus a small Sales campaign to /apply for retargeting site visitors from the last 7 days. Interests: Bali, Indonesia travel, Lombok, Komodo, Yogyakarta; travel intent; exclude Indonesia residents in the foreign-language campaigns. Placements: Advantage+ with Audience Network off.
- Budget for the fallback: €1,000/month Meta, €200/month TikTok test, remainder of the €3,000 to Google mode B.
- Tracking already exists: browser pixel + Conversions API with dedup (docs/tracking.md). Put the privacy paragraph live and gate the pixel on consent for EU visitors.

TikTok: "Ads for services related to immigration law are not allowed"; legal services only with 18+ targeting and no consultation offers (ads.tiktok.com, "Other products and services"). Arrival card assistance is not legal advice, but a reviewer may read it that way. Run 18+ only, creative built around the free guide and the 72-hour reminder, landing on /reminder. Expect manual review; do not appeal more than once.

2. Account structure

Account settings (set once, cannot be changed later): currency EUR, time zone (GMT+08:00) Hong Kong. Auto-tagging on. Enhanced conversions off until the GA4 user-provided data feature is wired (needs code). Link GA4 property, Search Console and Merchant Center (not needed).

2.1 Campaigns

Sixteen Search campaigns: one Transactional and one Informational per market. Names in the CSV: EN-Transactional, EN-Informational, ... ID-Informational. All imported **paused**. Enable per the launch plan.

Market	Campaign languages	Locations (presence, not interest)	Excluded	Notes
EN	English	Australia, New Zealand, Singapore, Malaysia, Philippines, India, United States, Canada, United Kingdom, Ireland, Netherlands, South Africa, United Arab Emirates	Indonesia, China	UK, Ireland, Netherlands only after Consent Mode v2 is live
DE	German	Germany, Austria, Switzerland	–	All three need Consent Mode v2 (CH treated like EEA)
ZH	Chinese (traditional), Chinese (simplified)	Taiwan, Hong Kong, Macao	–	Google Ads does not serve in mainland China; ads are Traditional Chinese; the /zh page is Simplified (see 6). Add Singapore and Malaysia with a Simplified ad variant later
FR	French	France, Belgium, Switzerland, Luxembourg	–	Consent Mode v2 needed; add Canada (Quebec) in month 2

Market	Campaign languages	Locations (presence, not interest)	Excluded	Notes
ES	Spanish	Spain, Mexico, Argentina, Chile, Colombia, Peru	–	Spain needs Consent Mode v2; start with LatAm if the banner is late
JA	Japanese	Japan	–	
KO	Korean	South Korea	–	
ID	Indonesian	Indonesia	–	Returning citizens and residents; no e-VOA ad group

Location option: "Presence: people in or regularly in your targeted locations" (not "interest"). Otherwise the EN campaign soaks up Indonesian residents searching in English.

2.2 Budget: €3,000/month test

Split by expected search volume and value per order, daily = monthly ÷ 30.4. Transactional 60 % / Informational 40 % in mode A. In mode B the Transactional line is paused and its money moves to the Informational campaign of the same market.

Market	Monthly €	Daily T	Daily I	Expected CPC (search, mode A terms)	Expected CPC (informational terms)	Source basis
EN	1,050	20.70	13.80	\$0.90–2.50	\$0.40–1.20	Travel median CPC \$2.12–2.17 (LocaliQ 2026; PPCChief 2026); visa-assistance terms sit below immigration-law terms (\$15–40, Media Spearhead) because the buyer is a tourist, not a client
DE	420	8.30	5.50	€0.70–1.80	€0.30–0.90	DACH travel CPCs run 20–30 % under US (Statista travel CPC by country, 2024)
ZH (TW/HK/MO)	300	5.90	3.90	\$0.50–1.50	\$0.25–0.70	Lower competition; few paid "入境卡" advertisers
FR	240	4.70	3.20	€0.60–1.50	€0.30–0.80	
ES	210	4.10	2.80	€0.40–1.20	€0.20–0.60	LatAm CPCs lower than Spain
JA	240	4.70	3.20	¥80–250 (\$0.55–1.70)	¥40–120	
KO	240	4.70	3.20	₩700–2,000 (\$0.50–1.50)	₩300–900	
ID	150	3.00	2.00	Rp 800–3,000 (\$0.05–0.20)	Rp 500–1,500	Indonesian CPCs from Rp 800 (Lopokopi 2026; Celcius Digital 2026)
Reserve	150	–	–			Search-term harvesting, later Performance Max test

These CPCs are estimates. No public dataset quotes "indonesia arrival card" bids. Verify in Keyword Planner before launch and replace with week-1 actuals. The Max CPC caps in the CSV (EN 1.80/0.90, DE 1.40/0.70, ZH 1.00/0.50, FR 1.10/0.60, ES 0.90/0.50, JA 1.20/0.60, KO 1.10/0.60, ID 0.15/0.08, in EUR) are ceilings for "Maximize clicks" during weeks 1–2.

2.3 Schedule, devices, bidding

- Ads run 24/7. The reason: a traveler files inside the 72 hours before landing, at any hour, often from an airport.
- Dayparting instead of "3 days before arrival" (which no signal supports): most cards are filed the evening before departure in the traveler's home time zone. Bid +15 % on the market's local 18:00–23:00, –30 % on local 01:00–06:00. For EN the "local evening" is the Asia-Pacific evening (AU, NZ, SG, MY, PH), which is also the hour when Indonesia-bound flights from Europe depart. Ad schedules are entered in the account time zone (GMT+8):

Market	Local evening 18–23	In account time (GMT+8)	Night –30 % (GMT+8)
EN (APAC weighted)	AEST/NZST/SGT	16:00–23:00	03:00–08:00
DE, FR, ES (Europe)	CET/CEST	00:00–06:00 (next day)	09:00–13:00
ZH (TW/HK)	CST/HKT	18:00–23:00	01:00–06:00
JA, KO	JST/KST	17:00–22:00	00:00–05:00
ID	WIB	19:00–24:00	02:00–07:00

- Devices: no adjustment for two weeks. Then expect mobile to convert on /reminder and desktop on /apply (passport photos and typing). Adjust ± 20 % from the data, not from a guess.
- Bidding: "Maximize clicks" with the Max CPC ceiling for two weeks or until 15 conversions per campaign, then "Maximize conversions" with a target CPA (section 7). Informational campaigns optimize to `generate_lead`.
- Ad rotation: optimize. Ad Strength will show "Average" because Headline 1 and Description 1 are pinned. That is intended: the pinned description carries the disclosure, which policy requires to be visible.
- Search partners off. Display expansion off. Broad match off (all keywords are phrase or exact).
- Performance Max: not before month 2, and only for the Informational goal (lead) with brand exclusions for "imigrasi", "All Indonesia" and the competitor names. PMax cannot be kept away from acquisition intent; in mode B it is a policy risk.

3. Keywords (docs/google-ads-keywords.csv)

Import: Google Ads Editor > Account > Import > From file. The file creates 16 campaigns, 63 ad groups, keywords and campaign-level negatives. Review the "Campaign" rows first (budget, status) and set locations, languages and schedules by hand (Editor's CSV does not carry them reliably across accounts).

3.1 Ad groups and landing pages

Ad group	Intent	Final URL (per locale prefix)	Why this page
arrival-card-generic	transactional	/apply	Price is on step 1; the form refuses payment outside the 72-hour window and captures a reminder instead
bali-arrival-card	transactional	/apply	Same, Bali is the highest-volume modifier
evoa	transactional	/evoa	Government fee itemised; no 72-hour gate
family-children	transactional	/apply	Multi-traveler pricing shown on step 1
how-to-fill	informational	/reminder	Searcher is planning, usually more than 3 days out; the reminder is the useful answer and the lead event
app-problems	informational	/guide	The guide's problems table answers the query; then the CTA

Ad group	Intent	Final URL (per locale prefix)	Why this page
customs-declaration	informational	/customs	Allowance table and calculator; not a government-document ad
transit	informational	/reminder	Planning-stage query; free reminder

Every keyword is Phrase match. The first three per ad group are duplicated as Exact match so the search-terms report shows which head terms drive orders. Totals per market (phrase + exact): EN 87, DE 74, ZH 73, FR 73, ES 73, JA 73, KO 73, ID 64. Base phrase lists are 32–45 per market. Trim to the 30 best after two weeks of search-term data.

Sample of the EN list, to show the pattern:

Ad group	Keywords
arrival-card-generic	indonesia arrival card, indonesia arrival card online, indonesia digital arrival card, arrival card indonesia, indonesian arrival card, e arrival card indonesia, indonesia arrival card assistance, indonesia entry card, indonesia arrival card help
bali-arrival-card	bali arrival card, bali arrival card online, arrival card bali, bali digital arrival card, bali entry card, bali arrival form, jakarta arrival card, lombok arrival card
app-problems	all indonesia app not working, all indonesia app problems, all indonesia arrival card not received, all indonesia qr code not received, arrival card indonesia error, all indonesia app crash, arrival card indonesia wrong date, retrieve arrival card indonesia
how-to-fill	how to fill indonesia arrival card, how to complete all indonesia arrival card, indonesia arrival card guide, when to fill indonesia arrival card, indonesia arrival card 72 hours, indonesia arrival card how many days before, bali arrival card when to apply, indonesia arrival card step by step

The other seven languages follow the same eight groups with native search phrasing (e.g. DE "einreisekarte indonesien", ZH "印尼入境卡", JA "インドネシア 入国カード", KO "인도네시아 입국카드", ID "kartu kedatangan"). ID has no evoa group.

3.2 Negatives and why

Applied to every campaign as campaign-level negatives (label `negative-shared`), plus a per-language set (negative-local). Phrase match, so the negative removes any query containing the word.

Negative	Reason
free, "for free"	The searcher wants the free official form. Showing a paid ad here is the exact complaint pattern in competitor reviews and a policy risk ("fees for a free service").
official, government, gov, go.id	Navigational intent for the government site. Serving our ad there implies affiliation.
imigrasi, ditjen imigrasi, direktorat jenderal imigrasi, bea cukai, beacukai, satusehat, kemenimipnas, kemenkumham, molina	Government brand names. Bidding on them is impersonation risk and gets the "Misrepresentation" flag.
login, log in, sign in	Portal or app login intent. Zero purchase intent; high complaint risk.
scam, fake, fraud, legit	Researching scams. Our ad next to "scam" queries hurts trust and CVR.
download, apk, app store, play store, ios, android	App download intent.
visa exemption, visa free, visa-free, exemption list	Eligibility research, not an arrival card or e-VOA purchase.

Negative	Reason
jobs, job, career, vacancy, salary, internship	Employment queries mentioning immigration.
kitas, kitap, work permit, student visa, second home, golden visa, b211, c1 visa, extension, overstay, deportation	Long-stay and legal immigration matters we do not handle. Also TikTok/Meta "immigration law" territory.
wikipedia, reddit, tripadvisor, news, meaning, pdf, sample, template, example	Pure information or document look-ups.
embassy, consulate	Consular services.
refund, chargeback, trustpilot, review	Post-purchase and reputation queries.
indonesia-portal, indonesia portal, indonesia-arrival.com	Competitor brands. Their searchers are checking whether that site is legitimate; not our traffic.

Local sets repeat the same ideas per language (DE kostenlos/offiziell/behörde/betrug..., FR gratuit/officiel/arnaque..., ES gratis/oficial/estafa..., ZH 免費/官方/政府/詐騙..., JA 無料/公式/詐欺..., KO 무료/공식/사기..., ID gratis/resmi/pemerintah/penipuan...).

Brand negatives to keep us clear of impersonation: everything in the "government brand names" row above. "all indonesia" is deliberately **not** a negative: it is the descriptive name of the card and the head of the app-problems queries. The ads never use it as our name (see 4).

Add weekly from the search-terms report: any query with "official", "gov", a government domain, or a competitor brand that slipped through a different spelling.

4. Ads (docs/google-ads-rsa.csv)

63 responsive search ads: 8 markets × 8 ad groups (ID has 7). Each has 15 headlines (≤30 characters) and 4 descriptions (≤90). For Chinese, Japanese and Korean the check counts full-width characters as two, as Google does. Path 1/Path 2 are set per ad group (e.g. arrival-card/assistance, guide/72-hours).

Layout of every ad:

- Headlines 1–7: ad-group specific. Headline 1 is pinned to position 1.
- Headlines 8–15: shared set. Transactional: "Private Assistance Service", "Not A Government Website", "From \$24.90 Per Traveler", "Price Shown Before You Start", "Human-Checked, Sent By Email", "Free 72-Hour Window Reminder", "Support 07:00–23:00 WIB", "Full Refund If Delivered Late". Informational: "Private Assistance Service", "Not A Government Website", "Free Step-By-Step Guide", "Free 72-Hour Window Reminder", "Updated September 2026", "Links To The Official Portal", "No Account, No Payment Now", "Plain-Language Explanations".
- Description 1 is the disclosure and is pinned to position 1, so it always shows: "Private assistance service, not affiliated with any government website. Price shown first." (transactional) or "... Free guide." (informational).
- Descriptions 2–3: ad-group specific (price, delivery time, what is checked; or what the guide covers).
- Description 4: the 72-hour hook: "The portal opens only 72 h before arrival. We email you the moment your window opens."

Rules applied in every language:

- Never "official", never "government-approved", never an emblem. "All Indonesia" appears only inside the app-problems headline as the name of the app ("All Indonesia App Not Working?"), which is descriptive use of the product the user is searching for, never as our brand.

- Price visible in every transactional ad (headline and description), including the e-VOA split "\$39.90 service fee plus IDR 500,000 visa fee".
- Informational ads carry no price and no "we submit" claim.
- Prices are in USD in all languages, as on the site (DE/FR/ES show "24,90 \$", ID shows "US\$24,90").

Example, EN / bali-arrival-card (transactional):

#	Headline	Description
1	Bali Arrival Card Help (pinned)	Private assistance service, not affiliated with any government website. Price shown first. (pinned)
2	Landing In Bali? Card Prepared	Flying to Bali? We prepare and check your arrival card and email the QR before you land.
3	Bali Arrival Card, Checked	From \$24.90 per traveler. Express under 2 hours. Support daily 07:00–23:00 Jakarta time.
4	QR Code Before You Fly To Bali	A person checks every field, submits inside the 72-hour window and emails your QR code.
5–7	Express Option Under 2 Hours · Works On Your Phone · Bali, Jakarta, All Airports	
8–15	shared transactional set	

Example, DE / how-to-fill (informational): "So füllen Sie die Karte aus", "72-Stunden-Regel erklärt", "Wir mailen, wenn es losgeht", "Jede Frage erklärt", "Portal & App erklärt", "Gesundheit & Zoll erklärt", "Jetzt Gratis-Erinnerung setzen" + shared informational set; descriptions "Privater Assistenzdienst, mit keiner Regierungswebsite verbunden. Gratis-Leitfaden." (pinned), "Leitfaden Einreisekarte Indonesien: was Sie brauchen, die 72-Stunden-Regel, jede Frage.", "Gratis-Erinnerung für Ihr Datum. Maximal zwei E-Mails, kein Konto, Abmeldung per Klick.", "Das Portal öffnet erst 72 h vor Ankunft. Wir mailen, sobald Ihr Fenster offen ist."

Chinese ads are Traditional (TW/HK/MO). The /zh landing page is Simplified; see section 6 before enabling ZH.

4.1 Final URLs

`https://allindonesia-arrivalcard.com{prefix}{path}?utm_source=google&utm_medium=cpc&utm_campaign={market}-{intent}&utm_content={adgroup}` with prefix "" for EN and /de, /zh, /fr, /es, /ja, /ko, /id otherwise.

Example: `https://allindonesia-arrivalcard.com/ko/reminder?`

`utm_source=google&utm_medium=cpc&utm_campaign=ko-informational&utm_content=how-to-fill`. Google appends `gclid` by auto-tagging. Longest path+query is 106 characters, under the 200-character clip in `lib/analytics-client.ts`.

4.2 Assets (add in the UI at campaign level; Editor's asset CSV format differs)

Sitelinks (text ≤25 characters; two description lines ≤35 each; final URL with the campaign's UTMs and `utm_content=sitelink-*`):

Lang	Guide → /guide	Pricing → /pricing	e-VOA → /evoa	Reminder → /reminder
EN	Free guide	Pricing	e-VOA assistance	72-hour reminder
DE	Gratis-Leitfaden	Preise	e-VOA-Assistenz	72-Stunden-Erinnerung
ZH	免費教學	價格	e-VOA協助	72小時提醒
FR	Guide gratuit	Tarifs	Assistance e-VOA	Rappel 72 h

Lang	Guide → /guide	Pricing → /pricing	e-VOA → /levoa	Reminder → /reminder
ES	Guía gratuita	Precios	Asistencia e-VOA	Recordatorio 72 h
JA	無料ガイド	料金	e-VOA代行	72時間リマインダー
KO	무료 가이드	요금	e-VOA 대행	72시간 알림
ID	Panduan gratis	Harga	Bantuan e-VOA	Pengingat 72 jam

In mode B, attach only Guide and Reminder sitelinks to the informational campaigns (Pricing and e-VOA point at paid pages).

Callouts (≤25 characters), attach the first four to informational campaigns, all six to transactional:

Lang	1	2	3	4	5	6
EN	Private, not government	Not a government website	Free 72-hour reminder	Support 07:00–23:00 WIB	Price shown first	No hidden fees
DE	Privater Assistenzdienst	Keine Regierungswebsite	Gratis 72-h-Erinnerung	Support 07–23 Uhr Jakarta	Preis zuerst sichtbar	Keine versteckten Kosten
ZH	私營協助服務	非政府網站	免費72小時提醒	客服07–23時雅加達	先看價格	無隱藏費用
FR	Assistance privée	Site non gouvernemental	Rappel 72 h gratuit	Support 7h–23h Jakarta	Prix affiché d'abord	Aucun frais caché
ES	Asistencia privada	No es sitio del gobierno	Recordatorio 72 h gratis	Soporte 7–23 h Yakarta	Precio visible primero	Sin costes ocultos
JA	民間サポート	政府サイトではない	無料72時間リマインダー	サポート7～23時	料金を先に表示	追加料金なし
KO	민간 지원 서비스	정부 웹사이트 아님	무료 72시간 알림	상담 07–23시	가격 먼저 표시	숨은 비용 없음
ID	Layanan bantuan swasta	Bukan situs pemerintah	Pengingat 72 jam gratis	Dukungan 07–23 WIB	Harga tampil dulu	Tanpa biaya tersembunyi

Structured snippet, header "Service catalog" (values ≤25 characters), transactional campaigns only: EN "Arrival card assistance, e-VOA assistance, 72-hour reminder, Customs guidance"; DE "Einreisekarten-Assistenz, e-VOA-Assistenz, 72-Stunden-Erinnerung, Zoll-Infos"; ZH "入境卡協助, e-VOA協助, 72小時提醒, 海關說明"; FR "Aide carte d'arrivée, Assistance e-VOA, Rappel 72 h, Infos douane"; ES "Ayuda tarjeta de llegada, Asistencia e-VOA, Recordatorio 72 h, Guía de aduana"; JA "入国カード代行, e-VOA代行, 72時間リマインダー, 税関ガイド"; KO "입국카드 대행, e-VOA 대행, 72시간 알림, 세관 안내"; ID "Bantuan kartu kedatangan, Bantuan e-VOA, Pengingat 72 jam, Panduan bea cukai".

Business name asset: "Arrival Card Assist". Logo asset: the site logo, no emblem. Price asset: skip (Google's price asset format invites "official price" confusion in this category).

5. Conversions and tracking

What exists (docs/tracking.md, lib/tracking.ts, lib/analytics-client.ts, components/Tracker.tsx): GA4 gtag + Meta pixel in the browser; `begin_checkout`, `generate_lead`, `purchase` from the browser; `purchase` again from the server (GA4 Measurement Protocol + Meta CAPI) with deduplication; first-touch `utm_source/medium/campaign`,

`gclid`, `fbclid`, landing page stored 30 days in `localStorage` and sent with every order and reminder.

Google Ads setup (no new Google Ads tag; import from GA4):

GA4 event	Google Ads action	Goal	Count	Value	Window	Attribution
purchase	Purchase (primary)	Purchases	Every	Use GA4 value (USD order total, government fee included)	90-day click, 1-day view, 3-day engaged view	Data-driven; falls back to last click while data is thin
generate_lead	Reminder saved (secondary in mode A, primary in mode B)	Submit lead form	One	Static €3 (assumption: ~12 % of reminders become a \$24.90 order)	30-day click	Data-driven
begin_checkout	Reached pay step (secondary, observation only)	Other	One	none	30-day click	–

Steps: GA4 Admin > Key events > mark `purchase` and `generate_lead`. GA4 Admin > Product links > Google Ads > link the account. Google Ads > Goals > Conversions > New > Import > Google Analytics 4 > Web > pick the two events. The 90-day window matters: a reminder is set up to 90 days before arrival and the order happens inside the last 72 hours. The stored `gclid` travels with the server-side purchase (`lib/tracking.ts` sends `gclid`, `source`, `medium`, `campaign`), so a late order still lands on the original click in GA4. Google Ads itself only credits within its own window, hence 90 days.

Value: GA4 property currency USD, Google Ads account EUR. Google converts at the daily rate; report CPA in EUR and compare with the USD targets in section 7 at ~0.92 EUR/USD, or set the account currency to USD if the bank card allows. Keep one.

Consent mode:

- EEA and UK traffic requires Consent Mode v2 for measurement, audiences and personalization since March 2024 (support.google.com/google-ads/answer/13695607). The site has no consent banner and `components/Analytics.tsx` loads `gtag` and the pixel unconditionally.
- Until a certified CMP with `gtag('consent', 'default', {... 'denied'})` for EEA/UK/CH visitors is live, do not target DE, AT, CH, FR, BE, LU, ES, UK, IE, NL. The EN campaign starts with the non-European countries listed in 2.1.
- With the banner live: `ad_storage`, `ad_user_data`, `ad_personalization`, `analytics_storage` default denied in those regions, updated on accept; the server-side purchase event should then only be sent for orders whose attribution carries a consent flag (already noted in `docs/tracking.md`). This is a code change; it is listed in section 6, not done here.

UTM convention (consistent with `getAttribution()`):

- `utm_source=google`, `utm_medium=cpc`, `utm_campaign={market}-{intent}` (e.g. `de-informational`), `utm_content={adgroup}` (e.g. `bali-arrival-card`), optional `utm_term={keyword}` via a tracking template later.
- `utm_source`, `utm_medium`, `utm_campaign` and `gclid` are stored as first touch; `utm_content` is not stored as a field but is kept inside `landingPage` (path + query, clipped at 200 characters). Keep URLs short; the longest one shipped is 106 characters.
- Meta: `utm_source=facebook|instagram`, `utm_medium=paid-social`, same campaign/content pattern. TikTok: `utm_source=tiktok`.
- Sitelinks: `utm_content=sitelink-guide|pricing|evoa|reminder`.

6. Landing page checklist (Google "Government documents and services" landing-page requirements plus general policy)

Requirement	Status	Where	Action
Business name and legal identity visible	In place	Footer on every page (components/Footer.tsx : Bulan Juli Limited, address, CR/BR numbers, email); /contact	None
"Private entity, not affiliated with any government" above the fold	In place	Amber bar on every page (components/Disclosure.tsx in app/[locale]/layout.tsx); hero sentence on / and /reminder ; full text at top of /apply ; footer box; /legal/disclosure	None
Fee disclosed before personal data	In place	/ PriceCard, /pricing , /apply step 1 "Price & travelers", /evoa itemised with the IDR 500,000 government fee	None
Statement that the document is free from the government, with a link to the official site	Partial	OfficialNote ("free of charge on the official government portal allindonesia.imigrasi.go.id") is on / , /guide , /legal/disclosure , /legal/terms only	Add OfficialNote to /apply , /reminder , /pricing , /evoa (with the e-VOA portal link) and /customs . These are the ad landing pages; a reviewer opens exactly these URLs
No government emblems, names or colours as branding	In place	lib/config.ts DISCLOSURE; header uses "Arrival Card Assist"	Keep. Note the domain contains "allindonesia" (see below)
Privacy policy covering ads tracking	In place, with a defect	/legal/privacy has the GA4/Meta paragraph (messages Legal.privacy.cookies) but shows "Template for legal review before launch"	Remove the template line on /legal/privacy and /legal/terms (app/[locale]/legal/privacy/page.tsx line 25, .../terms/page.tsx line 34) after the HK solicitor pass listed in docs/launch-checklist.md
Contact information	Partial	Email and support hours on /contact and footer; no phone or WhatsApp	Add a WhatsApp number or contact form. Not a hard policy requirement, but reviewers and card schemes weigh it
Refund policy	In place	/legal/refunds ; "Full refund if not delivered 6 h before arrival" on /pricing	None
Consent banner + Consent Mode v2 for EEA/UK	Missing	components/Analytics.tsx loads tags unconditionally	Add a certified CMP before any European targeting
Landing language matches ad language	Mismatch for ZH	/zh is Simplified Chinese (INTL_LOCALES.zh = zh-CN , messages/zh.json); the ZH ads are Traditional for TW/HK/MO	Either add a zh-Hant locale (i18n/routing.ts , messages/zh-Hant.json) or start the ZH campaign in Singapore/Malaysia with a Simplified ad variant. Do not send Traditional ads to a Simplified page; Google scores it as a relevance problem and TW users bounce

Requirement	Status	Where	Action
Domain does not imply government affiliation	Risk	<code>allindonesia-arrivalcard.com</code> contains the programme name "All Indonesia"	Policy-wise the disclosures mitigate it, but a reviewer applying "Misrepresentation" may not read past the domain. docs/launch-checklist.md already keeps a neutral fallback domain in reserve. Decide before the certification application: if the neutral domain is used for ads, it must be the canonical site, not a redirect
Acknowledgement at checkout	In place	<code>acknowledgeNotGov</code> checkbox in <code>app/[locale]/apply/ApplyForm.tsx</code>	None
Page speed and mobile	Assumed OK (static Next.js)	–	Run PageSpeed on <code>/reminder</code> and <code>/apply</code> in each locale once; fix anything under 70 mobile
No misleading urgency	In place	The 72-hour rule is a real portal constraint and is explained	Keep it factual; never "last chance"

7. Launch plan, KPIs, kill criteria

Unit economics used for targets: arrival card order \$24.90 (net ≈ \$23 after Airwallex, ops ≈ \$2, contribution ≈ \$21); e-VOA \$70.90 of which \$31 is passed to the government (service fee \$39.90, contribution ≈ \$34). Extra travelers add \$14.90 each, so average order value should sit near \$32.

KPI	Target (weeks 3–4)	Floor / kill
Search impression share, exact head terms	≥ 40 %	–
CTR, transactional	≥ 5 %	< 2 % after 1,000 impressions: rewrite
CTR, informational	≥ 3 %	< 1.5 %: rewrite
CPC	within the ranges in 2.2	> 2× the top of range for a week: lower caps or pause
CVR /apply → purchase (clicks inside window)	4–8 %	–
CVR /apply → generate_lead (clicks outside window)	10–20 %	–
CVR /reminder → generate_lead	15–25 %	< 5 % after 300 clicks: page problem, pause
Reminder → order (30 days)	10–15 %	< 5 %: fix the reminder email, not the ads
CPA purchase (arrival card)	target \$9, max \$12	> \$21 (contribution) over 2 weeks with ≥ 15 orders: pause the market
CPA purchase (e-VOA)	target \$14, max \$20	> \$34: pause the ad group
Cost per reminder lead	target \$1.50, max \$2.50	> \$4 with ≥ 100 leads: pause
Blended ROAS (Google-attributed revenue / cost)	≥ 2.5	< 1.5 at end of week 4: stop test
Dispute rate on ad-sourced orders	< 0.5 %	≥ 0.75 %: pause paid acquisition, fix checkout
Policy	0 strikes	Any account-level strike: stop all campaigns, appeal once, do not resubmit

Week 0 (now, before spend)

- File the Ditjen Imigrasi letter (courier + email + ePPID). File Google advertiser verification and the certification application with the letter as the evidence. Verify the Meta business.
- Site changes from section 6: OfficialNote on the five pages, template line removed, CMP if Europe is in scope for week 1.
- GA4: key events, Ads link, imports. Place one dev-mode order and one reminder; see both in DebugView and in Google Ads (conversion status "Recording conversions" after 24–48 h).
- Import the two CSVs into Editor. Set locations, languages, ad schedules, assets. Post everything paused. Fix Editor's validation warnings (usually a duplicate keyword or an ad-strength notice).

Week 1: EN, ID, JA, KO informational (mode B) or transactional + informational (mode A if the certificate arrived). Budget 50 % of plan. Check search terms daily; add negatives. Check disapprovals daily; appeal once with the informational argument. Confirm `gclid` is present on incoming reminders (admin > reminders > attribution).

Week 2: add ZH (after the zh-Hant decision), DE, FR, ES (after the CMP). Raise to 100 % budget in markets whose CTR is above floor. Switch campaigns with ≥ 15 conversions to Maximize conversions with a target CPA of \$2 per lead / \$12 per purchase. First ad-copy test: swap Headline 1 between "help" and "prepared for you" variants in the EN transactional groups.

Week 3: trim keywords to the 30 best per market. Move budget from markets above max CPA to markets below target. Add the sitelinks/callouts translations that are missing. Start the Meta Leads campaign (€250/week) in EN and DE pointing at /reminder.

Week 4: decide per market: scale (CPA below target), hold (between target and max), kill (above max). Write up: CPC actuals vs. estimates, reminder-to-order rate, dispute count. Decide on Performance Max for leads (only if mode A) and on Bing.

Kill the whole test if by day 28: fewer than 30 purchases plus 300 leads across all markets, or blended ROAS under 1.5, or any policy strike. Keep SEO, the reminder list and Meta running in that case.
